

LA CABANE PERCHÉE®

LA CABANE PERCHÉE®

As pioneers of a resolutely upmarket concept, we created La Cabane Perchée® (or The Cabin in the Treetops) in 1999.

Since then we have built almost 500 treehouses, no two of them alike, in France, Europe, the United States and Russia.

We design and build high quality treehouses for private individuals and tourism professionals.

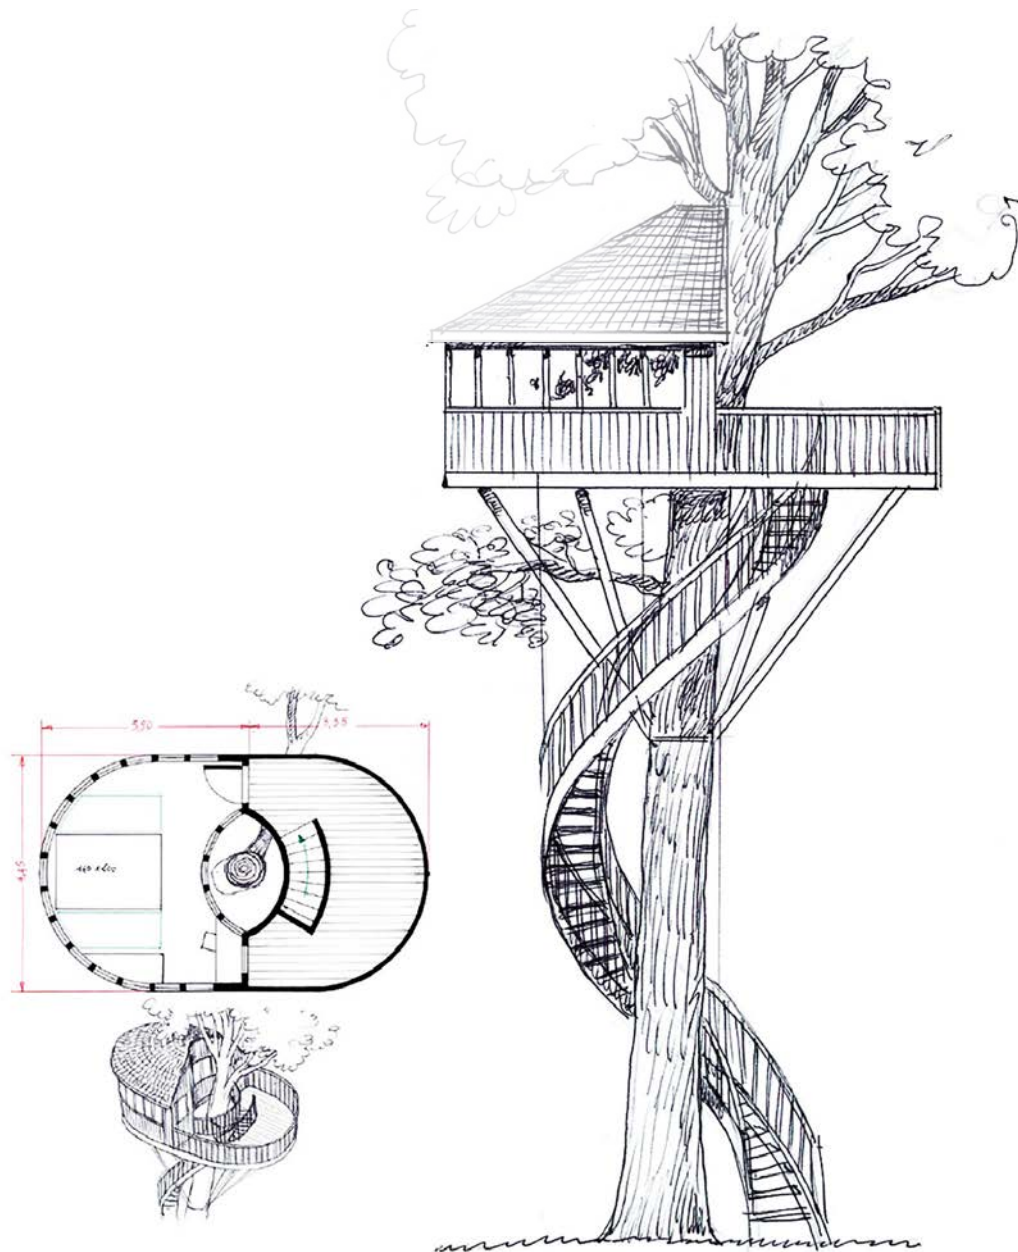

We also create treetop meeting rooms or lofty terraces for use by restaurants, for practising yoga and meditation, or quite simply for observing nature.

We also propose perched tasting rooms for wine estates.

THE CABANE PERCHÉE® TEAM

We are a team of artisan carpenters, joiners, cabinet makers, plumbers and electricians who have worked together from the outset, and have acquired unparalleled experience.

We can rise to any challenge to transform your dream into reality and an incredible human adventure.

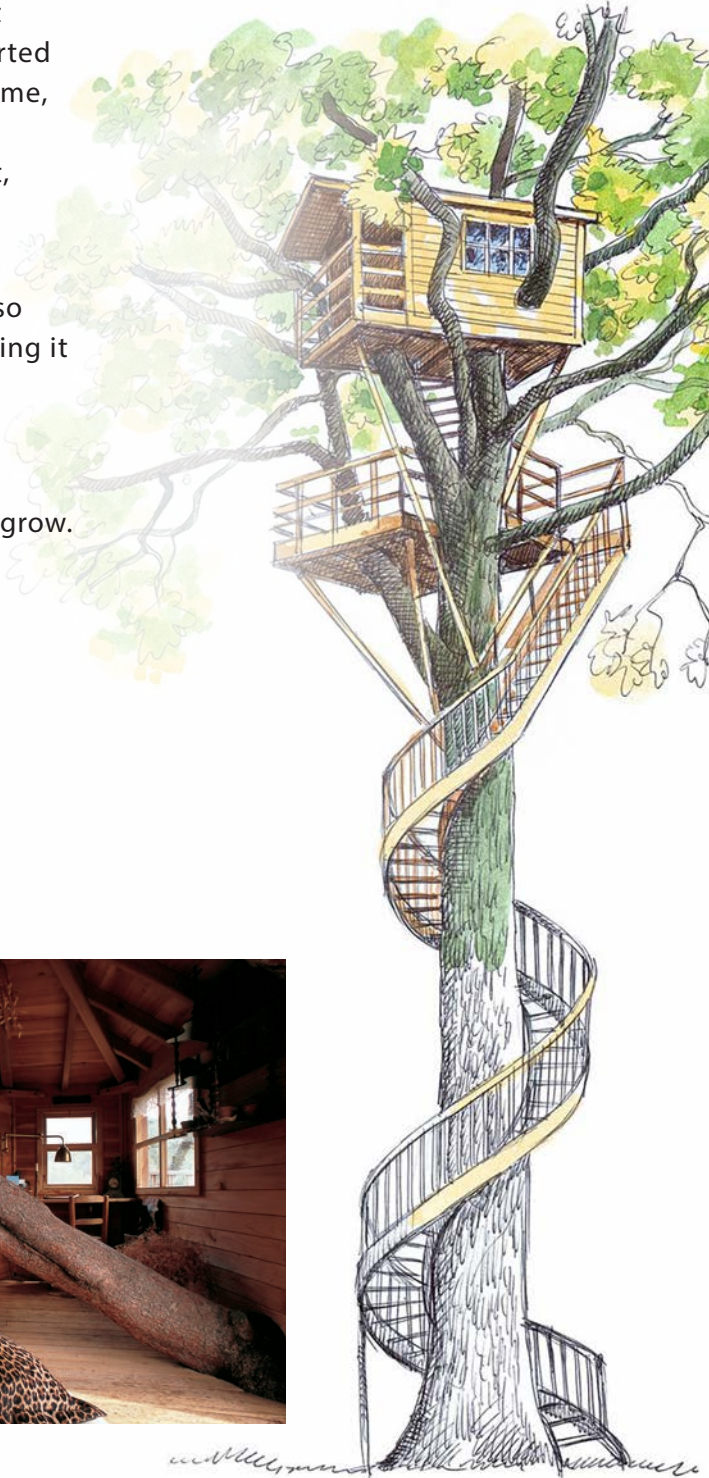

PRIVATE TREEHOUSES

After taking the precise measurements of the tree, and having listened attentively to what you want, we design and carefully plan your treehouse.

It is then entirely custom-built in our workshops and transported in several pieces to its final home, where the team responsible for the project will assemble it, in its tree.

The tree graciously acts as host to the treehouse, and so we must work without disturbing it and without cutting any major branches.

Our adjustable fixing systems give the tree total freedom to grow.

TREEHOUSE HOTELS

We very quickly came up with the idea of treehouses as accommodation for the tourist industry, and the concept was an immediate success around the world.

These treetop rooms book up several months in advance and can command prices of between 250€ and 600€ a night. A solid return on investment which means that the initial cost is quickly recouped.

Whether it's as a complement to a classic hotel offer or the creation of a small rental unit, these luxury treehouses, which are furnished and come equipped with all creature comforts, have very strong appeal.

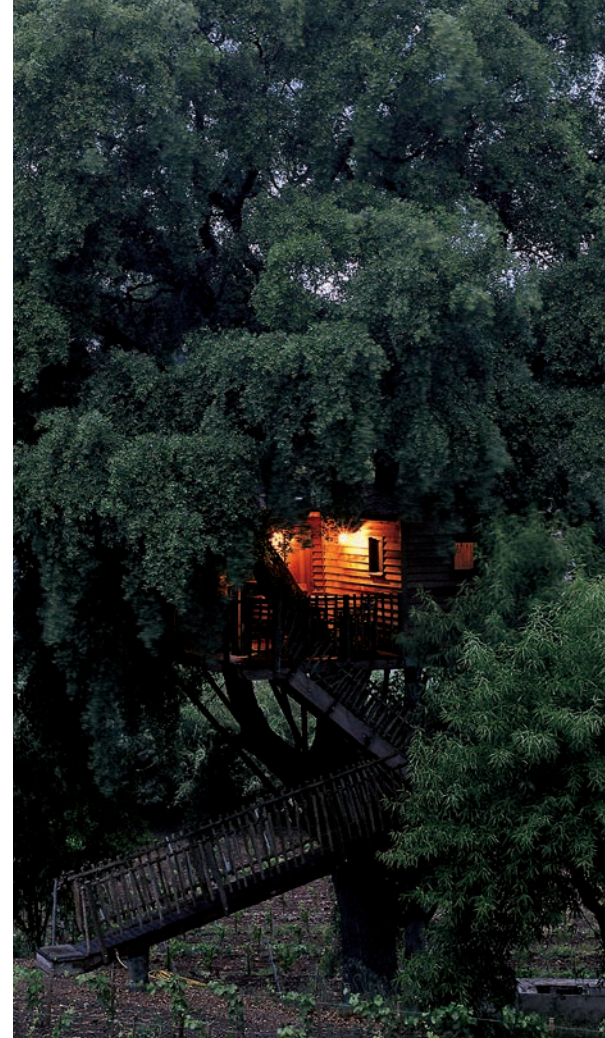

At a time when wine tourism is growing as an activity, they are perfect for unforgettable nights suspended in the heart of the vineyards.

LA CABANE PERCHÉE

TREETOP TERRACES

The first restaurant deck that we built in this huge plane tree received great attention from the press.

You can take lunch or dinner there, if you reserve well in advance.

A big treetop terrace is also an amazing place for yoga and meditation, for holding a seminar, for public relations activities, and many, many other things.

The original experience of being up in the trees is unforgettable, and guarantees the success of any event.

TREETOP TASTING ROOMS

Receiving visitors in the heart of the vineyards, with a stunning view over the vines, commenting your wines and tasting them in an exceptional setting, is what our treetop tasting rooms are made for.

They are all equipped to the highest professional standard. You can welcome your clients, partners or associates in the same conditions as “on earth” only you’re up in the sky.

Every treehouse is custom built to take precise account of individual wishes and requirements.

Tasting in the trees offers a memorable experience that your visitors will never forget.

THE ORIGINALS

Over the years we have created what we call our Originals.

These are one-of-a-kind creations, often springing from the imagination of the designer Ambroise Maggiar, who we work with regularly.

And we are always ready to be inspired by your ideas and dreams to create something totally new and unique.

SÈVE, conceived by Ghislain André (artisan carpenter) et Ambroise Maggiar (designer-Milan), offers the basis of an idea for a treetop tasting room.

LA CABANE PERCHÉE

SKYNEST, luxury treetop room concept.

CYCLOPE, a room that offers a panoramic view of nature.
